Uses feature(s): *eval*

Not called by script or any function (may be e.g. a hook, a Zle widget, etc.).

zi-wrap-functions
~~~~~~

```
FUNCTION: .zi-wrap-functions [[[
Handles the wrap'···' ice-modifier which allows to extend the tracking (e.g:
gathering of report and unload data) of a plugin
beyond the moment of sourcing it's main file(s). It works by wrapping the given
functions with a tracking-enabling
and disabling snippet of code.This is useful especially with prompts, as they
very often do their
initialization in the first call to their precmd hook function.
```

Has 19 line(s). Doesn't call other functions.

Uses feature(s): *eval*

Called by:

```
zi.zsh/.zi-load-plugin
zi.zsh/.zi-load-snippet
```
